

# **IETE-ISF**

## **SUMMER PROJECT PROPOSAL**

Name: Vidipt Khetriwal

Reg No: 20BIT0106

### **IETE Form**

**Domain:** Web Dev – Frontend + Backend

**Tech Stack:** HTML, CSS, JavaScript, NodeJS

**Idea:** I plan to make IETE independent of Google Forms

#### **Method of Implementation:**

Client Side:

HTML, CSS, JS will be used to create a standard layout of the form.

Server Side:

NodeJS will be used to store the details in a database. This can be used as per the requirement.

**Deadline:** I believe I would take a month's time in completing this project. So it will be completed by the end of August.

**Applications:** In an event, IETE uses google forms for registrations. From our next event, IETE would use IETE forms, instead of google forms.
